The results revealed that 72% of the respondents opined that their self interest is the inspiration for reading books. Majority of the respondents reading books to acquire information and to be an informative person. The findings also show that 72% of the respondents opined that mobile internet and using social media reduces the reading habit. 67% felt that they are comfort in using electronic devices to read online information.

Key words: PG students, Reading habits, Government Science College, Bangalore

Introduction

A good book is considered panacea for mental agony one suffers during day-to-day life. With the technological advancements in the satellite era, reading habit is said to have taken a beating, or it seems. But that is not the case as reading had never been a habit of common people. What seems to have changed over the years is the taste of youngsters who are more inclined to light readings with the plot they identify themselves with than the one loaded with philosophical anecdotes. Again, it depends on their taste.

Government Science college, Bangalore

The Government Science College is born out of the visionary foresight of the erstwhile Maharaja (King) of Mysore, His Highness Shri Nalvadi Krishnaraja Wodeyar on the 1st of April 1921 as an intermediate college. GSC has been dedicated to quality education and to preparing students for leadership in diverse walks of life while at the same time being tempered by social concern, empathy and visionary leadership across two centuries. Owing to its scope and pace of change, post-2000 will go down in the history of GSC as the period of its most spectacular expansion and quality enhancement. The introduction of PG courses, research programs, with three successive NAAC accreditations of B++ ,A and “A+” followed by CPE status in 2009 and 2015 and more recently- the autonomous status are some of the milestones of the last decade.

Knowledge Centre at Govt. Science College

Knowledge Center for accessibility developed on modern lines as a prominent Learning Resource Center. The Library has made sincere efforts to assure an environment for intellectual inquiry by providing user focused services to obtain and evaluate scholarly
information and knowledge available in main formats and strives to create new knowledge to increase understanding and develop wisdom. To keep pace with time and expectations of users, the library has facilities with 30 computers for browsing the internet, e-learning packages, and full text e-resources.

**Review of Literature**

Kamalipour, Robinson & Nortman (1998) study revealed that students spend 45.05% of their working hours per week attending to both electronic and print media for study and leisure reading activities.

Chittaranjan Panigrahi (1998) conducted a study on reading habits, information needs and information seeking behavior of the working women of Steel city, Rourkela. The study shows that 28% of them working women read for 1-2 hours a week, while 11% read for less than an hour, 21% of the respondents read for more than 6 hours a week in their respective subject fields or specialization.

Abdul karim & Hasan Ameila (2007) study understand the reading habits and attitudes of the Bachelor of IT students and the Bachelor of Arts students from the International Islamic university Malaysia. The study found that majority of the students read newspaper every day. Parlette, Melanie (2010) examined the reading habits and experiences of first-year undergraduate students at Dalhousie University and the University of King’s College in Halifax, Nova Scotia, Canada. This study suggests that reading for pleasure is a well-established habit amongst many first-year undergraduate students.

Natter (2010) reported the problems and suggestions to improve reading habits of college students in Tamilnadu. Respondents expressed that they are improving their reading habit using the facilities in the library.

Thankousdi (2011) conducted a study on reading habits among library and information science students of Annamalai University. The result of the study indicated that majority of the LIS students (79.53 %) are interested in reading LIS course material frequently, (46.19 %) of the students never read LIS journals. The study reveals that in a library there should be adequate reading area and related facilities to accelerate reading habits.

Baladhandayutham & Suji (2014) study analyze the reading habit among the students of engineering colleges in Madurai district. The findings revealed that more than half of the students spent an hour for reading and 88.92% of the students have newspaper reading.

**Objectives of the Study**

The study was carried out with the following objectives for the better understanding of PG Students reading behavior.

- To know the frequency of library visit and the purpose of reading
- To identify the people inspire for the book reading
- To examine the preferred language for book reading
- To determine the best time for reading for the women PG students
- To get the opinions on the impact of using internet and social media on reading
Scope and Limitations of the Study

Studies have been carried out to document the reading habits of the users in different PG disciplines. The present study is limited to Reading habits of women P.G students of Govt. Science College, Bangalore city, Karnataka.

Methodology

The study is carried out to explore the women PG students reading behavior at Govt. Science College, Bangalore. The population of PG students comprises the departments of Zoology, Mathematics, Bio Technology, Chemistry, Botany, Physics, and Microbiology only. The investigator selected only PG women students for the study. To collect the data from the respondents a structured questionnaire was prepared based on the objectives of the study, and the investigator personally distributed the questionnaires and receives the response from the eighty three students. The responses received from the students to the questions are presented in the form of tables and figures, analyzed by using a simple method of percentage calculation.

• Majority (45%) of the respondents spent 1-2 hours in a day for reading.
• Majority (89%) of the respondents opined that reading reduces their loneliness.
• Majority (72%) of the respondents opined that internet and social media usage reduces the Reading habit.
• Majority (61%) of the respondents reading online information sources like i.e., e-books, e-Journals, e-magazines etc.
• Majority (67%) of the respondents feel comfort to read online information using e-devices.

Suggestions

1. Students should spend their leisure time for reading useful books for recreation and for to get information for various needs.
2. Parents, teachers, as well as librarians should encourage the students in making use of libraries from the school days.
3. To improve the general awareness and to get useful information for the day to day life, it is suggested that all the students should invariably read news papers, magazines and journals.
4. In order to increase reading interests among the students “Book display programs”, “Celebration of book festivals “within the library can be held.

Conclusion:

Academic libraries are the soul of the institutions which should not remain silent when students are not visiting and asking for reading materials. Let be it in print or electronic form, the first and foremost role of academic library is to procure it and make it available to the students. We need to anticipate the changing pattern of students’ reading. This study shows that reading gets a serious attention among the women post graduate students of Govt. Science College, Bangalore. Most of the students got self motivated to reading than the motivation of their teachers or parents and also they visit the college library frequently. So that the librarian has an opportunity to inculcate reading habit by taking initiative and by way of organizing suitable programs to promote reading habits among the students.
